ADDED VALUE FOR YOUR PLANNING

Excerpts from our comprehensive
added-value range

Would you prefer things more digital?

Everything digital. Everything immediately. From kitchen photos to delivery information – our Media Portal and CIS are your direct line to all data.

CIS: You will find the latest order data, delivery times, and other information in our Customer Information System.

Media Portal: Our media portal makes it easy for you to find, save, and share images and information via email – it is fast, user-friendly, free, and accessible at any time.

E-Paper:

- Sales manual and appliance catalogue
- Brief type overview (specially for new customers)
- Available online
 - » 24/7
 - » Customer sales manual with personal login area
- Platform-independent
- Link can be provided as pure HTML format for integration into your own intranet

Highlights

Contemporary and well-thought-out product range

- Good ideas should not fall apart just because of restrictive specifications

Quick and easy planning

- Our innovative programs and tools enable us to support you in planning your dream kitchen efficiently and conveniently.

Fast delivery

- We deliver within just a few weeks. Guaranteed. On special request, even within just six IMPULS working days – anywhere in Germany.

Services

- Digital kitchen planner, product videos, an easy complaint management process – we provide you with the service you need.

Easy installation

- A good kitchen is many things, but not complicated to assemble. At least not when it comes from IMPULS.

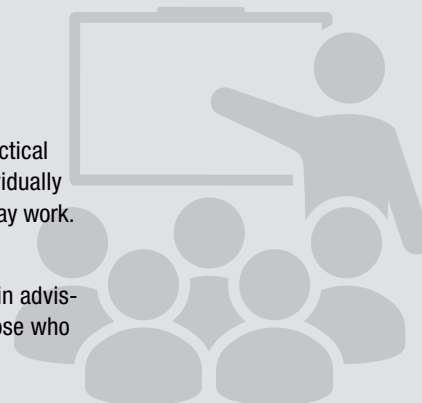

Product and sales training

Simply know more

Success in kitchen sales is no coincidence, but the result of know-how and practical experience. Our training courses take you from beginner to sales pro: with individually tailored content, experienced instructors and practical solutions for your day-to-day work.

From planning basics and product knowledge to sales pitch – gain confidence in advising and planning, and boost your sales success with lasting effect. Because those who truly understand products sell them more convincingly.

Go to our homepage for more information on our training concept.

Drawer systems

The right drawer option for **every budget** – available in standard silver grey finish (TANDEMBOX plus) on full-extension runner or, at extra cost, in anthracite (TANDEMBOX antaro) with optional glass sides. All drawer systems come with high-quality BLUM brand fittings, and provide long-lasting quality, gentle closing and maximum user convenience.

Benefiting from integrated **soft-closing convenience** pull-outs close automatically and super silently. And do so in every drawer system.

Sink base units with pull-outs

- Upper pull-out with optimum storage space utilization thanks to cutouts.

Interior organisation

- Cutlery trays (silver-grey plastic, anthracite plastic, wood)
- Non-slip mats also in silver-grey and anthracite
- Units with matching waste separation system

Equipment for corner base units

„Le Mans“

- Swing-out wooden carousel shelves with metal rail
- Maximum load-bearing capacity 25 kg per shelf
- Matching inserts in silver grey and anthracite

with semi-circular carousel shelf

- Permissible overall weight 20 kg per shelf

Versions:

- Plastic carousel shelves
- Wooden carousel shelves with metal rail

with three-quarter circle carousel shelf

- Permissible overall weight 20 kg per shelf

Versions:

- Plastic carousel shelves
- Wooden carousel shelves with metal rail

Self-installation

Water and electricity installation set

- Easy to order by combining sets
- Various sets in the range
- **Available within Germany**

Clip hinge

for unit heights 291 and 363 mm

with flap doors

- in the standard finish with sturdy flap stay, option 414
- **CLIP top BLUMOTION by Blum**
- option 418 (cost option) in combination with side-hung door soft closing
- with **AVENTOS HKS** flap stay, option 428 (cost option) in combination with side-hung door soft closing

Flap stay systems

Brand-name hinges either with or without integrated cushioning (extra charge).

Opening angle limiter

To protect doors in corner and wall solutions, the opening angle of the side-hung door is limited to 86°.

- Wooden shelf and metal rail
- Cabinet width: 300 mm
- Item typeP

Push-To-Open

Tip-On assisted opening for opening doors with a simple tap of the finger.

Pull-out units

with internal drawers

- Storage space utilisation in the pull-out over 2 levels.

Carrier for internal drawer / internal pull-out

- For screwing onto the front

Oven cabinets

Oven housing

- Available with panel, flap, or drawer.

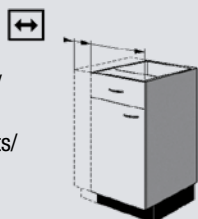

Custom-made solutions

Custom-made solutions give you the opportunity to adapt cabinets precisely to your spatial conditions and personal needs. Whether reducing the width or depth or deepening the carcass sides – targeted customization at a low additional cost creates tailor-made storage space that combines functionality and design to perfection. This enables you to use every last centimetre efficiently and to create a harmonious solution, even when the shape of the space is unusual.

1

Width reduction

- for base units with drawer/side-hung door
- for base units with pull-outs/side-hung doors
- for tall units/highboards
- for individual parts of a cabinet (except carcass)
- » possible for any width of drawer and pull-out between 30 and 100 cm

2

Depth reduction

- Cabinet-dimension reductions with millimetre-precision

3

Carcass side depth increases

Side depth increases for uneven walls, for example

4

Visible side

for base units, wall units, highboards and tall units

Units for special solutions

Tall unit with carrier frame for bottle crates

- 3 carrier frames
- Cabinet width 600 mm

Tall unit with Tandem-Solo

- The set-down trays slide out when the doors are opened.
- Baskets with wooden base and metal rail
- Cabinet width 600 mm

XSKitchen

- Customised solutions for small kitchens
- 2 functions in one unit. Here: refrigerator and oven

Behind the door

- Grip ledge lighting below the worktop with base units

LED built-in spotlight

- As an accessory item or as an extra-charge version per cabinet.
- Available with and without colour control

Grip ledge with up/down LED lighting

- In the carcase base shelf instead of the handle profile.
- Extra-charge version per cabinet

LED built-in light in the base shelf

- Including channel routing
- Straight aluminium profile
- Extra charge per cabinet

Fitting template / drilling jig for BLUMOTION and Tip-On

The right template makes easy work of ensuring millimetre-precision alignment during installation. The result: perfect installation results at the customer.

Item: MZ ZID 251 (IO points: 11)

Routed channels for lighting in the base panel

Base panels with routed channelling (56 mm diameter) direct from the factory. Benefit to you: less assembly work and perfect channelling. Illustration shows recessed Tip-On. Installation is easy and precisely on site using the fitting template shown on the left.

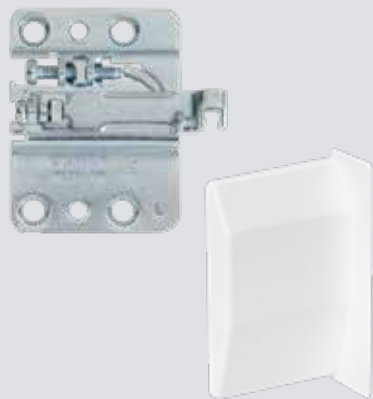

Planning flexibility, secure fit

Our wall units provide maximum stability and planning flexibility with carefully considered details that simplify installation and sales. From wall mounting to handleless opening and closing, every detail is right on point. And all in familiar IMPULS quality.

560 mm cabinet depth with heavy-duty fitting

For high load capacity and generous storage space. The heavy-duty fitting makes sure that wall units stay securely fitted on the wall even when fully laden.

Lift-off guard

The lift-off guard requires no additional drilling, can be operated easily by means of a slider and conveniently locks from the front.

New wall-mount fitting before installation

after installation with activated safeguard

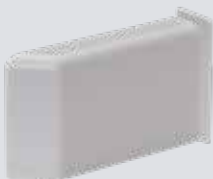

Cover caps

PUREline

Custom design with
handle profiles

IMPULS gives you maximum design freedom: With tall units, it is easy to combine horizontal and vertical handle profiles without side panels. In this way you can create not only a functional but also a visually appealing overall look – entirely to your own taste.

Installing horizontal
handle profile

Installing vertical
handle profile

Light, practical,
compatible

The high-quality aluminium construction of our split dishwasher front makes it significantly lighter than comparable models.

2 highboard heights
3 tall unit heights

The right unit for every height

We can provide you with a tall unit height that fits into your kitchen design perfectly.

Cabinet equipment

The cabinet with both a drawer and two pull-outs is a true highlight. Convenient, practical, clever.

**Times savings
during installation**

- Tool-free installation of the handle profile

Panels

Panel / corner panel with split fronts

4 grip ledge colours available

960 Recessed grip stainless steel effect

970 Recessed grip black

980 Recessed grip white

990 Recessed grip copper effect

The right solution for everyone

A clearly defined, coherently structured product line-up is not only easy to find your way about in – it provides real added value when it comes to advising customers. At IMPULS, you will find the same colours and decors across different price segments. This makes your planning work more efficient, decisions easier and sales talks more successful.

Targeted advice

The same decor colours in all price segments mean less need for explanations and more time for what really matters: winning over customers and identifying needs. You can focus on advising your customers rather than on any complicated product explanations.

Up- and downselling without compromising on style

Customers remain true to their chosen style, even when switching between products or upgrading at a later date. Whether from entry-level model to premium version or vice versa: the colour scheme remains consistent. This makes decisions easier and creates trust.

Ideal for different budgets

Whether couples or families with different financial resources: consistency means you can easily combine options and offer individually tailored solutions without compromising on design.

Worktops

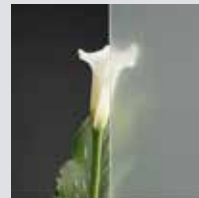

Our worktops are available in thicknesses of **25 mm and 40 mm**. High-quality three-ply chipboard with robust branded laminate provide a hard-wearing and low-maintenance surface.

- Whether 25 or 40 mm thick, the price remains the same.
- Maximum design consistency as all decors are available in both thicknesses.
- Available in depths of 60, 70, 80, 90 and 120 cm.
- Worktops can be cut precisely to any required depth for a perfect fit.
- On request, worktop edges are available in contrasting colours.

Choice of glass types at same price

All glass types are supplied as toughened safety glass.

Frosted glass

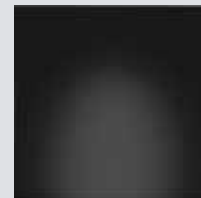

Clear glass

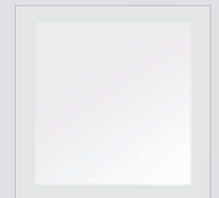

Smoky glass

Glass door, not tied to any range

Front thickness: 21 mm
as cost option

Glass door with black glass

Glass door with white glass

The right colour for every detail

Carefully considered colour schemes don't stop at the fronts. At IMPULS, carcass base panel undersides are colour-coordinated, solid-colour decors are available across all price groups, and plinths can be chosen in additional colour finishes. This gives you creative freedom, a quality look and genuine planning flexibility. Colour with every detail considered – in all parts of the kitchen.

Colour consistency

All solid-colour decors are available from price group 1 right through to price group 3. This provides genuine flexibility: customers choose their preferred decor and can, later on, switch between price groups without changing style. Whether spontaneous upgrade in planning talks or a later budget adjustment – the look remains the same, only material quality varies. This makes it easier to advise customers, alleviates decision-making pressure and reduces up/downselling to a breeze.

Carcass base-panel underside

At IMPULS, the carcass base-panel underside is colour-coordinated with the carcass. This means: if the carcass is chosen in oak effect or grey, the underside is finished in the same colour too. This creates a consistent, quality feel. No colour change to spoil the look, no cheap-feeling impression. A detail that really counts in everyday use – and makes compelling sales pitch.

Plinth colours

The plinth does more than simply perform a function – it defines the kitchen's overall impact. This is why IMPULS not only offers plinths in carcass decors but in additional colour finishes too. This permits deliberate contrasts or creates a calm, consistent look – in line with whatever the customer prefers. Whether tone-on-tone for clean-looking lines or deliberately contrasting for more depth and character: the choice of plinth colours provides creative flexibility without complicating the planning process.

Electrical appliances – Strong partners. Clear choice.

Choosing just the right electrical appliances is part of every good kitchen. We can give you access to a selected portfolio of renowned brands – and to high quality you can plan with a clear conscience.

privileg

PKM

BOSCH

AEG

VESTEL

Juno

Juno sets story by specialist retailers:
appliances are not marketed online, but instead sold exclusively through partners like you.

Sunny outlook

We're serious:

We operate a total of around 15,500 solar modules that help us to constantly save energy. And with success: we generate more than 4.3 million kilowatt-hours of electricity every year. This means we produce more electricity during the day than we actually need. And we save more than 2,600 tons of CO₂ a year.

However, electricity isn't the only area where we are working on sustainable solutions that we then continue to develop. We also made early decisions in the heating sector that are already paying off today. For the environment and for our customers, who continue to benefit from our low prices. What we do: We operate our own solid fuel combustion plant that generates around 3,5 million kilowatt-hours annually, thereby saving approximately 1,000 tonnes of fossil fuels. This enables us to cover about 85 percent of our heating requirement ourselves.

The fact that we regularly have our commitment evaluated demonstrates just how serious we are. And with success, as can be seen from the awards on the left.

Product lines

The kitchen range is divided into three clearly defined product lines. They make it easier to navigate the range during the sales process and help address different customer needs – from tried and proven standard solutions to design and user comfort-focused concepts.

BASEline The tried and proven standard

BASEline forms the range fundament and is synonymous with practical kitchen planning with time-tested features.

- Classic carcass height of **723 mm** in the base unit
- Proven grid system and planning logic
- Cost-effective, varied solutions

PUREline

PUREline Handleless aesthetic appeal

PUREline is synonymous with consistent, handleless kitchen design in a particularly clean and reduced look. It is based on the enhanced C range and leaves no margin of doubt with modern lines based on **787 mm** base-unit carcass height.

- Handleless design featuring clean-looking lines
- Calm, understated frontage look
- Modern, architectural design concept

Superb finish to planning a kitchen unit run

The carcass side remains enclosed behind an uninterrupted panel. The handle profile terminates neatly in a precision-routed pocket. This produces a perfectly balanced, quality finish with clean-looking lines at the end of the kitchen unit run.

HIGHline – 79.5 cm for

More storage.

More impact.

More options.

Far more kitchen on the same footprint – what may sound like a dream come true in sales pitch is now reality. Coming with 7.2 cm more carcass height than usual (**BASE**line), our new **HIGH**line simply gives you more planning options: more storage, ergonomic convenience and modern design, all benefits that will leave your customers delighted.

HIGHline

Added values from **HIGH**line:

More storage means more kitchen within the same footprint, more room for provisions, tableware and kitchen utensils—and simply more space that makes a real difference in everyday life.

More convenience means less back strain when chopping food and cooking, all thanks to the new ergonomic working height.

More impact comes from new proportions for modern kitchen architecture. **HIGH**line permits designs with generous front surfaces and clean lines, creating a calm, premium-quality look. Permitting versatile combinations with **IMPULS** front colours and decors, **HIGH**line is the new basis for designing superb, individually tailored kitchen concepts.

More options from broad planning flexibility. The additional carcass height creates versatile solutions for different spatial situations – while retaining the same straightforward **IMPULS** planning logic as **BASE**line and **PURE**line. As a result, **HIGH**line makes advising customer noticeably easier while providing compelling selling points that will let you address and win over new target groups.

Small kitchens. Immense opportunities.

XS is more than a size. It's a genuine sales opportunity. Because **XS**kitchen means you will be appealing to an ever greater audience: people without much space but discerning expectations. Kitchens under approx. 2.10 m in length that are quickly available, easy to plan yet speak quality.

Preconfigured planning solutions:

From classic to modern, from 1.50 m to approx. 2.10 m – every **XS**kitchen is fully preconfigured as a set-based item and can be upgraded with optional appliance and accessory sets. One item number, one sale. This speeds up the process of advising customers and significantly simplifies ordering.

Simply straightforward.

Planning appliances and accessories

Meeting any need and budget, there's the option of adding matching appliance and accessory sets. Here, every combination of kitchen range, size and appliances or accessories featured is set and preconfigured, and can be ordered using a single set item number – for maximum planning certainty. On request, fronts, colours and upgrades can be customised using any option from the entire IMPULS range. This provides the last word in flexibility in responding to customer wishes, speeds up the sales process and makes costing transparent at all times.

IP 1200 SET-XS-B01-01

Particularly clever: all pre-configured sets feature a 70 cm deep worktop and extra-deep carcass sides (66 cm) at the start and end of a unit run. This provides an easy way of concealing connections, power sockets or surface-mounted pipes running along the wall – without having to pay close attention to their exact position. The combination of extra-deep worktop and deeper carcass sides not only creates more work surface but also provides greater planning certainty and far more user convenience over the standard 56 cm depth. This makes fitting so easy and straightforward – with no additional end panels, no adjustments, no input.

IP 2200 SET-XS-B02-01

IP 2200 SET-XS-B03-02

IP 2200 SET-XS-B04-03

Preassembled delivered ex-works:

XSkitchen come preassembled, including matching appliances and accessories. This significantly reduces fitting time and gives your customers a kitchen that's swiftly installed without any complications.

Upgrade flexibility:

XSkitchen isn't a closed system. Anyone wanting to can include additional units, appliances, accessories or solutions from the IMPULS line-up whenever they choose. This is how to create bespoke kitchens – without the hassle of designing them from scratch.

Three delivery options:

Local stock items, prime delivery within a few working days, or direct delivery to the consumer – you decide which option best suits your business model.
